### Luna

---

#### 360° Diffusion lighting

Evenly distributes light in all directions (360°). It attracts a relaxed gaze toward the light source, creating a serene and very comfortable atmosphere. The light globe baptizes all surfaces of the space in light, producing a tranquil, richer, and extremely even environment.

Ø20cm, Ø30cm  
2700–6000K

### Hemishpere

---

#### Directed diffusion lighting

Emits soft light, creating low contrast between the illuminated area and the projected shadows. The opaque part of the lampshade helps guide light through the diffuser, providing both serene and focused lighting effects.

Ø10cm, Ø20cm, Ø30cm  
2700–6000K

### Cone

---

#### Directed diffusion lighting

Emits soft light, creating a low contrast between the illuminated area and the cast shadows. The opaque part of the lampshade helps guide the light through the diffuser, providing both a tranquil and concentrated lighting effect.

Ø40cm, Ø60cm, Ø80cm  
2700–6000K

### Focus

---

#### Directed Diffusion Lighting

Emits soft light, creating a low contrast between the illuminated area and the cast shadows. This type of lighting is particularly suitable for reading scenarios or when the light is directly visible, as it does not produce glaring light.

Ø 10cm  
2700–6000K

### Line Diffuser

---

#### Directed Diffusion Lighting

High uniformity, and it generates the primary layer of lighting. Soft shadows and gentle brightness in this illumination, where space and its components do not exhibit visual hierarchy.

100cm, 200cm  
2700–6000K

### Belt track

---

Max 30 metres available per electrical connection, belt length personalised for each composition.
